

Hey there, buddies! Have you ever seen a Baltimore Oriole? These bright, orange and black birds are a sight to behold, way different from many other bird species. They're small, around 7 to 8 inches in length, with the males more colorful than the females who are yellow-brown. And guess what? They're named after the coat-of-arms of Lord Baltimore because their colors match so well!

Now, let's talk about where these beautiful birds live and what they eat. Baltimore Orioles are found in North America, where they love hanging out in open woodlands, gardens, and orchards. These little guys are not picky eaters! They love fruits, insects, and nectar. Their favorite is probably the juicy, sweet nectar from flowers and fruit!

Have you ever wondered about the life of a Baltimore Oriole? Well, in the spring and summer, they breed and raise their young in a neat nest that the female weaves and hangs from tree branches. In the winter, they fly south to Central and South America for a little vacation. Talk about a bird's life!

Baltimore Orioles have a special relationship with humans and other animals. They help us by eating harmful insects and they're also important pollinators, helping flowers and fruit trees to grow. When it comes to defending themselves, they use their sharp beaks and quick flight to escape danger. So, isn't it cool to learn about these awesome birds? Baltimore Orioles are truly one-of-a-kind!

Solve each problem.

Use the article to answer the question.

- 1) What are the colors of a male Baltimore Oriole?
A. Green and purple B. Blue and white
C. Orange and black D. Red and yellow
- 2) Where do Baltimore Orioles go during winter?
A. Eastern and Southeast Asia B. North and Central Africa
C. Southern and Western Europe D. Central and South America
- 3) Are females Baltimore Oriole as colorful as males?
A. No, they are yellow-brown B. Yes, they are green and purple
C. Yes, they are bright orange and black D. No, they are blue and white
- 4) How do Baltimore Orioles defend themselves?
A. They make loud, scary noises
B. They puff up their feathers to look bigger
C. They camouflage with the surroundings
D. They use their sharp beaks and quick flight to escape danger
- 5) What is the favorite food of a Baltimore Oriole?
A. Bark of certain trees B. Seeds from various plants
C. Small insects and bugs D. Nectar from flowers and fruit
- 6) What is the length of a Baltimore Oriole?
A. 5 to 6 inches B. 10 to 12 inches C. 1 to 2 feet D. 7 to 8 inches
- 7) Why are these birds named Baltimore Oriole?
A. They're the official bird of Baltimore
B. They were first spotted in Baltimore
C. Lord Baltimore first discovered them

A. North America B. Asia C. Africa D. Europe
- 10) What do Baltimore Orioles love to eat?
A. Fruits, insects, and nectar B. Berries, nuts, and roots
C. Grains, seeds, and leaves D. Fish, frogs, and snails

Determine if the statements is something the animal would say (W) or it is not something the animal would say (N).

11) "In winter, we fly south to Central and South America for a vacation."

12) "I don't make nests, instead I prefer burrowing holes on the ground."

- 13) "We prefer to go north during winter."
- 14) "I prefer to eat only meat."
- 15) "We may look small, but we're longer than half a ruler!"
- 16) "Our favorite food is juicy nectar from flowers and fruit. We just love the sweet stuff!"
- 17) "I don't care for fruits at all."
- 18) "Winter? No need to go anywhere. It's my favorite season."
- 19) "I hate sweet stuff, especially nectar."
- 20) "We're not just beautiful, our colors serve a purpose- they help us hide and blend into our surroundings."
- 21) "We actually don't build nests, we hole up in tree trunks like woodpeckers do!"
- 22) "We Baltimore Orioles help humans by eating harmful insects."
- 23) "I can't be found in North America, just Asia and Europe."

Determine if the statement is a fact or opinion based on the information in the article.

- 24) Baltimore Orioles breed and raise their young during spring and summer seasons.
- 25) Baltimore orioles' history with Lord Baltimore is fascinating.
- 26) Baltimore Orioles feed on fruits, insects, and nectar.
- 27) It's kind of amazing that orioles can help flowers and fruit trees grow.
- 28) Baltimore Orioles are small birds, measuring up to 8 inches in length.
- 29) It's awesome that orioles can change their diets throughout the year depending on what's available.
- 30) Baltimore Orioles migrate to Central and South America during winter.
- 31) Baltimore Orioles are named after the coat-of-arms of Lord Baltimore.
- 32) Female Baltimore Orioles have a more beautiful coat than the males.
- 33) The way female orioles weave and hang their nests is the best way to build a home.

Determine if the statement is true or false.

- 34) Baltimore Orioles can use their sharp beaks to defend themselves.
- 35) Female Baltimore Orioles are more colorful than males.
- 36) Baltimore orioles eat fruits and insects.
- 37) Baltimore Orioles are white with black spots.
- 38) A Baltimore Oriole's favorite food is juicy sweet nectar from fruits.
- 39) Baltimore Orioles hibernate in winter.
- 40) Baltimore Orioles only eat pomegranates.
- 41) Baltimore Orioles breed and raise their young in burrows underground.
- 42) Baltimore orioles are orange and black birds.
- 43) Baltimore Orioles spend their winters in Central and South America.

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 44) Baltimore orioles can fly long distances during migration.
- 45) Are Baltimore orioles commonly found in North America?
- 46) Baltimore orioles build their nests high up in trees.
- 47) Baltimore orioles are known for their vibrant orange and black feathers.
- 48) Do Baltimore orioles migrate long distances during the winter?
- 49) Do Baltimore orioles build their nests in trees?
