

Have you ever looked up into the sky and spotted a shiny, black bird soaring above? That's probably a common raven, a bird as clever as it is mysterious! Ravens are larger than most other songbirds, and they're covered in sleek, black feathers from head to tail. With their large, hooked beaks and ruffled throat feathers, they're quite a sight to see!

Now that we know what they look like, let's check out where these birds call home. Ravens are pretty adaptable and can live in many different places, from cool forested regions to hot, arid deserts. They also like both rural areas and urban cities, making their nests high up on cliffs, trees, or even buildings. So, whether you live in the countryside or in the heart of a bustling city, you have a good chance of spotting a raven!

Speaking of spotting a raven, have you ever wondered what these birds like to eat? Ravens are omnivores, which means they eat both plants and other animals. Their diet can include fruits, seeds, nuts, insects, worms, and even small mammals or birds! They are also known to scavenge, which means they often eat food that other animals have left behind.

intrigue to our world!

Now, let's peek into how ravens interact with the world around them. They have a complex relationship with humans, sometimes being seen as pests, but also admired for their intelligence and adaptability. In the animal kingdom, ravens are known for their playful nature and strong social bonds, often forming lifelong pairs. So, as you can see, common ravens are not just any bird, they're a remarkable species that brings a lot of character and

**Solve each problem.**

**Use the article to answer the question.**

- 1) What color are a raven's feathers?  
A. White                      B. Black                      C. Brown                      D. Grey
- 2) What is the nature of ravens in the animal kingdom?
