

**Choose the statement that explains what the given value tells you about the data.****Answers**

- 1) The list shows the number of letters Paul wrote each week.
8, 12, 2, 8, 6, 4
The median of the data is 7. What does that tell you?
- A. Paul wrote fewer than 7 letters half the time and more than 7 the other half.
B. Paul wrote 7 letters more often than any other number.
C. If Paul had written the same number of letters each week, it would have been 7.
D. Paul wrote 7 letters in all.
- 2) The list shows the number of chapters Jerry read each week.
1, 6, 3, 3, 10, 7
The mode of the data is 3. What does that tell you?
- A. There were 3 numbers in the list.
B. Jerry read 3 chapters more often than any other number.
C. Jerry read fewer than 3 chapters half the time and more than 3 the other half.
D. If Jerry had read the same number of chapters each week, it would have been 3.
- 3) The list shows the number of songs Cody sang each night.
4, 2, 11, 1, 2, 10
The mean of the data is 5. What does that tell you?
- A. Cody sang 5 songs more often than any other number.
B. If Cody had sung the same number of songs each night, it would have been 5.
C. The greatest number of songs Cody sang was 5 more than the least.
D. Cody sang fewer than 5 songs half the time and more than 5 the other half.
- 4) The list shows the number of catches Will made in each game.
5, 6, 7, 12, 1, 5
The mean of the data is 6. What does that tell you?
- A. Will made fewer than 6 catches half the time and more than 6 the other half.
B. Will made 6 catches in all.
C. If Will had made the same number of catches in each game, it would have been 6.
D. Will made 6 catches more often than any other number.

1. _____

2. _____

3. _____

4. _____
