

**Choose the statement that explains what the given value tells you about the data.****Answers**

- 1) The list shows the number of goals Gwen scored each week.
2, 4, 3, 7, 3, 12
The mode of the data is 3. What does that tell you?
- A. Gwen scored fewer than 3 goals half the time and more than 3 the other half.
B. If Gwen had scored the same number of goals each week, it would have been 3.
C. The greatest number of goals Gwen scored was 3 more than the least.
D. Gwen scored 3 goals more often than any other number.
- 2) The list shows the number of minutes Lana practiced each night.
2, 3, 11, 12, 3, 5
The median of the data is 4. What does that tell you?
- A. If Lana had practiced the same number of minutes each night, it would have been 4.
B. Lana practiced 4 minutes more often than any other number.
C. The greatest number of minutes Lana practiced at one time was 4.
D. Lana practiced fewer than 4 minutes half the time and more than 4 the other half.
- 3) The list shows the number of songs Henry sang each night.
3, 10, 1, 3, 8, 11
The mean of the data is 6. What does that tell you?
- A. Henry sang 6 songs in all.
B. Henry sang fewer than 6 songs half the time and more than 6 the other half.
C. If Henry had sung the same number of songs each night, it would have been 6.
D. Henry sang 6 songs more often than any other number.
- 4) The list shows the number of pages George read each night.
4, 3, 11, 4, 8, 7
The mode of the data is 4. What does that tell you?
- A. George read 4 pages more often than any other number.
B. If George had read the same number of pages each night, it would have been 4.
C. The greatest number of pages George read at one time was 4.
D. George read fewer than 4 pages half the time and more than 4 the other half.

1. _____
2. _____
3. _____
4. _____
