

**Choose the statement that explains what the given value tells you about the data.****Answers**

- 1) The list shows the number of laps Dave walked each day.
12, 7, 9, 7, 6, 10
The median of the data is 8. What does that tell you?
- A. There were 8 numbers in the list.
B. Dave walked fewer than 8 laps half the time and more than 8 the other half.
C. Dave walked 8 laps more often than any other number.
D. If Dave had walked the same number of laps each day, it would have been 8.
- 2) The list shows the number of catches Sam made in each game.
2, 7, 4, 6, 10, 7
The mean of the data is 6. What does that tell you?
- A. Sam made fewer than 6 catches half the time and more than 6 the other half.
B. If Sam had made the same number of catches in each game, it would have been 6.
C. Sam made 6 catches more often than any other number.
D. The greatest number of catches Sam made at one time was 6.
- 3) The list shows the number of letters George wrote each week.
10, 6, 12, 5, 5, 1
The mode of the data is 5. What does that tell you?
- A. George wrote 5 letters more often than any other number.
B. George wrote fewer than 5 letters half the time and more than 5 the other half.
C. If George had written the same number of letters each week, it would have been 5.
D. There were 5 numbers in the list.
- 4) The list shows the number of laps Paige ran each day.
1, 2, 6, 11, 2, 4
The median of the data is 3. What does that tell you?
- A. Paige ran fewer than 3 laps half the time and more than 3 the other half.
B. The greatest number of laps Paige ran was 3 more than the least.
C. Paige ran 3 laps more often than any other number.
D. If Paige had run the same number of laps each day, it would have been 3.

1. _____

2. _____

3. _____

4. _____
