

**Choose the statement that explains what the given value tells you about the data.****Answers**

- 1) The list shows the number of goals Debby scored each week.
9, 11, 2, 10, 2, 12
The mode of the data is 2. What does that tell you?
- A. Debby scored 2 goals more often than any other number.
B. The greatest number of goals Debby scored at one time was 2.
C. If Debby had scored the same number of goals each week, it would have been 2.
D. Debby scored fewer than 2 goals half the time and more than 2 the other half.
- 2) The list shows the number of chapters Frank read each week.
5, 1, 11, 9, 7, 9
The mean of the data is 7. What does that tell you?
- A. Frank read fewer than 7 chapters half the time and more than 7 the other half.
B. The greatest number of chapters Frank read was 7 more than the least.
C. Frank read 7 chapters more often than any other number.
D. If Frank had read the same number of chapters each week, it would have been 7.
- 3) The list shows the number of miles Vanessa biked each week.
5, 2, 12, 9, 9, 4
The median of the data is 7. What does that tell you?
- A. Vanessa biked 7 miles in all.
B. Vanessa biked 7 miles more often than any other number.
C. Vanessa biked fewer than 7 miles half the time and more than 7 the other half.
D. If Vanessa had biked the same number of miles each week, it would have been 7.
- 4) The list shows the number of laps Maria swam each day.
11, 10, 9, 5, 5, 1
The median of the data is 7. What does that tell you?
- A. Maria swam 7 laps in all.
B. Maria swam 7 laps more often than any other number.
C. Maria swam fewer than 7 laps half the time and more than 7 the other half.
D. If Maria had swum the same number of laps each day, it would have been 7.

1. _____
2. _____
3. _____
4. _____
