

Say hello to the Parakeet, a small, brightly colored bird that is sure to capture your heart! These little feathered friends are known for their vibrant colors, ranging from green, blue, to even yellow! They have a long, tapered tail and a small beak perfect for cracking open seeds. With their swift wings and chirpy voices, parakeets are truly a delight to watch and listen to.

Now that we've met these cheery creatures, let's take a sky-high journey to their homes. Parakeets are native to Australia but have made their homes in many parts of the world, including America and Europe. They love to nest in tree hollows and are often found in grasslands, woodlands, or even in busy cities! So, no matter where you are, keep your eyes peeled for a flash of color in the sky - it might just be a parakeet!

After a fun day of exploring, these little adventurers love to munch on their favorite foods. Parakeets have a varied diet that includes seeds, fruits, vegetables, and even insects! They have a knack for foraging and can often be seen hanging upside down on tree branches, searching for a tasty meal. Remember, the way to a parakeet's heart is through its belly!

Parakeets aren't just beautiful and fun-loving, they also have a special place in the hearts of humans. Many people keep them as pets because they are friendly, easy to care for and can even learn to mimic human speech! They live for about 10 to 15 years, growing from tiny hatchlings to mature birds, and throughout their lives, they bring joy to those around them. So, whether they're whizzing through the sky, munching on a snack, or chattering away in their cage, parakeets truly are a feathered treasure.

Solve each problem.

Use the article to answer the question.

- 1) What is the shape of a parakeet's tail?
A. Flat and long. B. Long and tapered.
C. Short and round. D. Curved and feathered.
- 2) Can parakeets mimic human speech?
A. No B. Only adult parakeets C. Only young parakeets D. Yes
- 3) Where are parakeets native to?
A. Australia. B. Europe. C. Asia. D. Africa.
- 4) How long do parakeets live for?

- 10) How do parakeets forage for food?
A. By flying high into the sky. B. By diving into the water.
C. By digging into the ground. D. By hanging upside down on tree branches.

Determine if the statements is something the animal would say (W) or it is not something the animal would say (N).

- 11) "I have a large beak, not suitable for cracking seeds."

- 12) "I love to nest in caves."
- 13) "You can recognize me by my long, tapered tail and my small beak."
- 14) "My colors are dull."
- 15) "I do not eat insects."
- 16) "I'm originally from Africa."
- 17) "Seeds, fruits, vegetables and even insects - we enjoy a varied diet."
- 18) "When I'm in search of food, you might find me upside down on tree branches, munching on a tasty meal."
- 19) "My friends and I are often seen in different colors, including green, blue and yellow!"
- 20) "I prefer to live alone and avoid social interactions."
- 21) "I'm from harsh cold arctic regions."
- 22) "I can live for 50 years."
- 23) "Originally, we come from Australia, but now, you can find us in many parts of the world, even in America and Europe!"
- 24) "I don't like eating fruits."
- 25) "Did you know I can mimic human speech? It's one of the many talents I possess."
- 26) "When I'm not flying, you can often find me nesting in tree hollows."
- 27) "We have been kept as pets by many humans because we are friendly, easy to care for and can mimic human speech."
- 28) "I don't like to eat seeds."
- 29) "My beak is the perfect shape to crack open seeds."
- 30) "I can live for up to 15 years."

Determine if the statement is a fact or opinion based on the information in the article.

- 31) Parakeets eat a variety of foods, which consists of seeds, fruits, vegetables, and occasionally insects.
- 32) The colors of parakeets are more exciting than those of any other bird.
- 33) Parakeets originally come from Australia but they are also found in America and Europe.
- 34) It is really impressive how parakeets can eat so many different kinds of food.
- 35) Parakeets come in a variety of colors such as green, blue, and yellow.
- 36) The fact that parakeets can mimic human speech is the coolest thing ever!
- 37) Parakeets have the ability to mimic human speech.
- 38) Parakeets are excellent at cracking open seeds due to their small beak.
- 39) Parakeets have the most beautiful and vibrant colors among birds.
- 40) Caring for parakeets is an easy task for people of all ages.

Determine if the statement is true or false.

- 41) Parakeets can hang upside down on branches to find food.
- 42) Parakeets are not able to eat insects.
- 43) Parakeets beaks are perfect for cracking open seeds.
- 44) Parakeets do not like fruits.
- 45) Parakeets mainly eat seeds.
- 46) Parakeets live for more than 20 years.
- 47) Parakeets are large, dull colored birds.
- 48) Parakeets do not have tail feathers.
- 49) Parakeets can mimic human speech.
- 50) Parakeets nest in tree hollows.

Determine which choice is the expanded form of the underlined contraction.

- 51) It's important to keep their cages clean and supplied with fresh food and water.
A. That is
B. It is
C. This is
D. He is
- 52) Parakeets don't like being alone.
A. do not
B. can't
C. does not
D. won't
- 53) They're small birds that can live up to 15 years in captivity.
A. It is
B. That is
C. We are
D. They are
- 54) They'll make a lot of noise if they're not properly taken care of.
A. They will
B. We will
C. It will
D. You will
- 55) You've probably seen one in a pet store before.
