

Imagine a bird with a dazzling display of colors, sparkling like a rainbow - that's right, we're talking about the spectacular peacock! These beautiful creatures have a magnificent fan-like tail, filled with bright blue, green, and gold patterns, which they can open like a fan. Peacocks, or peafowl, as they are known, have a crest of short feathers on their heads, another amazing part of their unique look. And guess what? It's only the males that have these stunning colors, the females, known as peahens, are more of a plain brown color.

Speaking of their colors, did you know that the fancy feathers are not just for show? Peacocks use them to attract peahens during mating season, and the ones with the brightest and most colorful tails often win the ladies' hearts. After a baby peacock, called a peachick, is born, it takes about three years for it to grow up and get its own beautiful tail. During this time, the young peacocks stick close to their moms for protection and guidance.

From their time as chicks, peacocks have quite the varied diet. They enjoy munching on plants, flower petals, seed heads, insects and even small creatures like amphibians and reptiles! Although they can fly, peacocks prefer to spend most of their time on the ground, foraging for food. These birds are native to South Asia and Africa, but can now be found in many parts of the world, including parks, zoos and even some backyards!

With their splendid appearance, peacocks have also found a special place in human hearts and cultures. They are often seen as symbols of beauty and immortality and have been featured in countless artworks and myths. Despite their friendly interactions with humans, peacocks have a unique way of protecting themselves from predators. They use their loud calls and stunning tail feathers to confuse or scare off enemies, showing us that being beautiful doesn't mean you can't be tough too!

So, there you have it! From their stunning feathers to their varied diet and their special place in our culture, peacocks are truly one of a kind.

Solve each problem.

Use the article to answer the question.

- 1) What are peahens?
A. Females peacocks
B. Babies of peacocks
C. A type of food for peacocks
D. Male peacocks
- 2) What colors are the feathers on the peacock's tail?
A. purple and orange

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 11) "I originally come from South Asia and Africa, but now you can find me in parks, zoos, and even some backyards!"
- 12) "These colorful feathers are not just for show! I use them to attract peahens."
- 13) "My feathers shimmer with shades of green, gold, blue like a rainbow when I open them up wide!"
- 14) "You will find us peacocks only around South Asia and Africa."
- 15) "Even though I can fly, I mostly prefer to stay on the ground, hunting for food!"
- 16) "I exclusively eat plants and nothing else."
- 17) "We peacocks have always been a symbol of good luck in cultures."
- 18) "I am often seen as a symbol of beauty and immortality."

- 19) "I use my loud calls and dazzling tail feathers to scare off predators."
- 20) "I eat a lot of things - plants, flower petals, insects, and even some small reptiles!"
- 21) "I have a plain, dull colored tail."
- 22) "While young, we stick close to our moms for protection and food!"
- 23) "My baby, peachick, will have its beautiful tail as soon as it's born."
- 24) "It takes about three years for a baby peahen or peacock to get a tail as beautiful as mine!"
- 25) "Peahens always fall for the peacocks with the least colorful tails."
- 26) "I am a peahen and my feathers are as colorful and striking as the peacock's."
- 27) "See those short feathers on my head? That's my crest."

Determine if the statement is a fact or opinion based on the information in the article.

- 28) Peacocks are originally from South Asia and Africa but can now be found worldwide.
- 29) Baby peacocks, known as peachicks, take about three years to grow a tail like adult peacocks.
- 30) Peacocks have the most stunning tail feathers of all bird species.
- 31) Peacocks are the most amazing creatures with their turquoise, blue, and green colors.
- 32) Peacocks are the most beautiful birds in the world.
- 33) Peacocks have the most vibrant colors of all animals.
- 34) Male peacocks are more colorful than female peahens.
- 35) Peacocks have a diet which includes plants, insects, and small animals.
- 36) Peacocks use their bright feathers to attract peahens during mating season.
- 37) Baby peachicks are cuter than any other bird babies.
- 38) Peacock calls are the most unpleasant sound.

Determine if the statement is true or false.

- 39) Peacocks are seen as a symbol of beauty and immortality.
- 40) Peacocks are not friendly to humans.
- 41) Only male peacocks have vibrant colors.
- 42) Female peafowl are more colorful than males.
- 43) Peacocks are native to South Asia and Africa.
- 44) A baby peacock is called a peahen.
- 45) Peacocks cannot fly.
- 46) Peacocks eat only plants.
- 47) Peacocks can be found in many parts of the world.
- 48) Peacocks use their feathers to impress peahens.

Determine which choice is the expanded form of the underlined contraction.

- 49) Peacocks aren't able to fly very high in the sky.
A. can not
B. are not
C. will not
D. are able
- 50) Peacocks aren't found in Antarctica.
A. are not
B. will not
C. can not
D. are able

- 51)** It's known that peacocks are very colorful.
A. It has
B. It will
C. It was
D. It is
- 52)** I've heard that peacocks can make very loud noises.
A. I have
B. I am
C. I will
D. I was
- 53)** They're known for their large and colorful tail feathers.
A. They will
B. They were
C. They are
D. They have

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 54) Peacocks can fly for short distances.
- 55) Peacocks can display their vibrant plumage to attract mates, isn't that fascinating!
- 56) The length of a peacock's tail can reach up to six feet - it's incredible!
- 57) The colors in a peacock's feathers are a result of light reflection, not pigmentation - that's so mind-boggling!
- 58) The lifespan of a peacock is as long as 20 years - isn't that impressive!
- 59) Male peacocks have colorful feathers.
- 60) How long do peacocks live?
- 61) You won't believe this, but the term "peacock" is actually only used for male birds, female ones are called peahens!
- 62) Peacocks live in forests and grasslands.
- 63) How do peacocks attract a mate?
- 64) Peacocks are native to Asia, but are now found all over the world - that's a really massive spread!
- 65) What do peacocks look like?
- 66) Not all peacocks are colorful, some are completely white, it's quite a sight to behold!
- 67) Would you believe, peacocks eat both plants and animals!
- 68) Baby peacocks are called peachicks - that's a cute name!
- 69) In spite of their enormous tails, peacocks can actually fly - what an astonishing fact!
